Accessing Library Resources from off-campus

The library provides off-campus access to electronic resources to staff members. Staff members attempting to access these will be prompted for a user name and password. The username is the employee ID number. The account is disabled by default and staff members can follow these instructions to enable their account and set the password.

Please note these instructions have to be performed on a computer located on the SAUWI campus network.

The password would have to be set by using the form at the url https://intranet.sauwi.uwi.tt/wireless/. You will be prompted to logon to the intranet with a dialog similar to that below.

Your username and password will be the one you use to logon to the computers on the SAUWI campus network.

After successful logon, the form shown would be similar to that below
Enter the employee ID number and then click “enable account”. Note that the employee ID number being entered has to be the employee ID number of the user logged on to the machine.

If the message shown below is displayed, your employee ID number has to be added to the system. Send an email to servicedesk@sta.uwi.edu specifying your name, employee id number, and faculty/department and report that your employee ID number is missing from the UWLinc and STA-Mobile wireless system. Once your employee ID number has been added, you will be able to access the system and enable the account.
Once the account is enabled, a form is displayed for you to enter your password. The password change form is shown below.
The employee ID, new password and confirm password fields are required. Click on “Change Password” to set the new password. Once the change is successful, these credentials (the employee ID and password set here) can be used to access the library’s electronic resources.

The account can be disabled by clicking on the “Disable Account” button (the employee ID has to be entered to disable the account). Access to the library’s electronic resources is removed when the account is disabled.

Any problems being experienced can be sent to servicedesk@sta.uwi.edu
